Maryland

URS Table Number	General Notes
4, 5a, 6, 15	The increases in total number of consumers employed, enemployed, not in labor force, total number of consumers with both Medicaid and non-Medicaid funding, total admissions to community program during the year, total number of consumers living in private residence, total number of consumers in jail/correctional facility, and total number of consumers that were homeless or in shelters are due to changes in reporting criteria that better represent the required definitions.
12	The decrease in the percent of adults served by the SMHA with co-occurring MH/SA diagnoses from FY2012 to FY2013 is due to a shift in billing practices by providers. Maryland's PMHS does not pay claims for any individual with a primary diagnosis of substance abuse. To avoid any possible delays in payment or potential denial of payment, some providers are leaving off substance abuse diagnosis data on claims entirely. This has produced data that shows an underrepresentation of actual co-occurring served in the PMHS.
